Are worth more than their weight  
in gold to anyone. Some of us  
possess them; others do not. The  
most perfect white teeth, if neglected  
become worthless, pain-jumping  
stumps. You say I have good teeth.  
How can I keep them so? By tak-  
ing proper care of them.

## Cause of Decay

The cause of decay of the teeth  
was unknown until a few years ago.  
It is nothing more or less than lactic  
acid. The acid is produced by the  
particles of food lodged around the  
teeth, which owing to the warm  
temperature in the mouth ferment  
and produce this acid. Tartar is a  
deposit which discolors the teeth.  
As this increases it pushes the  
gums down from the enamel of the  
teeth to the bony structure, and in  
time, will cause the teeth to become  
loose.

ALSEN  
PORTLAND  
CEMENT

WE HAVE JUST RECEIVED a large shipment of this celebrated Cement,  
which is the STRONGEST AND MOST SERVICEABLE CEMENT MADE,  
and will permit the admixture of a larger amount of sand, gravel, with less  
loss of strength, than any other brand; it is therefore the most economical.  
ALSEN has no equal in color, fineness and sand carrying capacity. It  
weighs less per bushel, measuring about 10 per cent more cement to a barrel  
than other brands, which very materially reduces its cost as compared with  
other cements. It is therefore an economical cement to use, and specially  
adapted for fine concrete work.

The following tests, made in actual work by Col. D. C. Houston, Corps of  
Engineers, U. S. A., at the sea wall arounds; seven days, 600 pounds; thirty  
days, 1,000 pounds; ninety days, 1,200 pounds; one year, 1,500 pounds; Tensile  
strength per square inch—One day, 384 pound Governor's Island, New York Har-  
bor, 513 pounds.

For sidewalks it gives the best color and the most durable wearing sur-  
face.  
A few of the large contracts in which Alsen Cement was used: Cable R.  
R., Baltimore, 35,000 barrels; Quebec Harbor Improvement, 20,000 barrels; Nor-  
thern Pacific R. R. Bridges, 20,000 barrels.
